

Pasquale Lops is Associate Professor at the University of Bari, Italy, where he received the Ph.D. in Computer Science in 2005. His research interests include recommender systems and user modeling, with a specific focus on the adoption of techniques for semantic content representation. He has been the principal investigator of University of Bari in two Interreg MED projects. He is author of more than 200 publications, in international journal, conferences and workshop proceedings, as well as of the textbook "Semantics in Adaptive and Personalized Systems: Methods, Tools and Applications", edited by Springer. He regularly serves in the PC of the top conferences in his areas. He was Area Chair of User Modelling for Recommender Systems at UMAP 2016, and co-organized more than 20 workshops related to user modeling and recommender systems. He gave a tutorial on "Semantics-Aware Techniques for Social Media Analysis, User Modeling, and Recommender Systems" at UMAP 2016 and 2017, he was a speaker at two editions of the ACM Summer School on Recommender Systems. He was a keynote speaker at the 1st Workshop on New Trends in Contentbased Recommender Systems (CBRecSys) at RecSys 2014, and he gave the interview "Beyond TFIDF" in the Coursera MOOC on Recommender Systems. He is the coordinator of the 2nd and upcoming 4th edition of the Master in Data Science at University of Bari.
